DESKING THAT GETS YOU

Your Desk, Your Way

Your organization has a unified purpose, shouldn't it have a unified look? Voi desking offers desks and storage solutions for every application—private offices, semi-private offices, open plan, benching, and more—while presenting an integrated design for the entire workplace. The layered worksurfaces, practical storage components, mixed materials and versatile footprints can be customized to achieve the perfect mix of functionality and style. Voi boasts an efficient offering that is also easy to specify, order and install. Select the durable, attractive top-grade laminate or the rich, lustrous wood veneer finishes, which both feature HON quality construction to ensure that your investment will pay off for years to come.

Voi GETS YOU MOBILE Smaller footprints make Voi the perfect touchdown station for on-the-go people. THE WAYS WE WORK Voi's selection of worksurface shapes and storage options come together cleverly to support the variety of work tasks people need to compete. Do you need to set the stage for collaboration? Establish the appropriate tone for meeting with clients? Use open space more efficiently? Voi makes it all possible—and more.

PRIVATE OFFICE
Inside four walls with a
door, Voi (shown in
veneer) strikes the right
mix of professionalism and
personality for executives
and managers.

SEMI-PRIVATE

Whether they're used by one person or shared, Voi semi-private offices (shown in veneer) are perfect for workers whose desking needs can be met in smaller footprints. In these applications, Voi uses architectural walls for power access.

THE SPACES IN YOUR SPACE

Voi's integrated design unites a workplace, bringing a variety of spaces together with a consistent style. You can easily outfit your entire facility with Voi laminate or veneer desking, including private offices, semi-private offices, benching stations, and touchdown stations. And the same kit of parts and pieces that form desks in these applications are compatible with HON's, Accelerate or Abound workstations in open plan configurations.

OPEN PLAN
