# THE NEW NORMAL:

RETURNING TO ***THE CLASSROOM***

**WIST**  
Business Supplies & Equipment

As schools reopen for in person learning across the country, we have compiled a guide to help you successfully reopen your school.

- The CDC recommends removing nonessential furniture and making changes to classroom layouts to maximize distance between students and facing desks in the same direction, where possible.
- Studies have found that transmission between staff is more common than transmission between students and staff. Maintaining 3 feet of distance remains a core principle for physical distancing when masks cannot be worn, such as when eating and during activities when increased exhalation occurs such as sports and exercise as well as in common areas such as school lobbies and auditoriums.
- Handwashing and respiratory etiquette remain important through ongoing health education units and lessons, teach children proper handwashing, and reinforce behaviors, and provide adequate supplies. Ensure that teachers and staff use proper handwashing and respiratory etiquette.

With the help of the Centers for Disease Control, this guide will aid facility managers and administrators work to reopen schools safely.
